I'm a driven professional with a broad technical skill set. A focused and detail-oriented Flutter mobile app developer with an eye for design and a passion for visually stunning and goal-oriented UIs, offering exceptional troubleshooting skills, ability to work effectively in teams and adapt to new environments & technologies quickly.

Universitat Politècnica de Catalunya '2020
Executive Master in Digital Marketing & eCommerce

Universidad de La Laguna, Tenerife '2017
Bachelor of Tourism and Hospitality Management

Tech Skills

Flutter & Dart
MVVM, MVP, Clean
architecture principles
Git & Command line
SOLID principles
Debugging
REST APIs
Shared Preferences
Firebase
State management
basics (provider, BLoC)
Dependency Injection
Basic animations, lottie
Material Design
UI/UX principles, Figma
QA basics
Agile methodology
Digital Marketing

Soft Skills

Proactivity
Learning mindset
Communication
Attention to detail
Teamwork
Creativity
Self-motivation
Adaptability

Flutter Developer | Basetis, Barcelona | Jul 2022 - Now

RIVER APP, Grup Hiper Pas (a supermarket chain in Andorra)

We started building this app from scratch as a team of 2 (a Senior focused on architecture and complex logic, and me - a Junior role, building the UI and basic logic). This project made me a person of reference for Flutter UI in our company, let me practice many API calls, taught me good practices. **What I did:**

- Created a library of custom components like buttons, dialogs, text fields, discount coupons, carousels, etc., + UI models and enums for them (over 15 reusable components)
- Created screens like login, home, profile etc. (18 in total)
- Set up API calls following the Senior's lead, including coupons activation, email confirmation, password recovery etc. (15 in total)
- Set the logic of password validation, discounts, barcode activation, decoding countries and cities, refreshing the queue, regular expressions for emails and passwords etc.
- Implemented a single typographic theme w/ Material Design principles
- Modified image assets using Adobe PS and SVG code
- Suggested and implemented Lint rules to agilize the development

LA MERCÈ APP, Ajuntament de Barcelona (the main annual festival of Bcn)

We made changes to the old version of the app, updated the design, added new functionality. This project taught me to make reusable widgets, work in a diverse team and make an app accessible. This app launch has improved the Google play's app ranking from 2.6 to 4.0 and the App Store's from 3.6 to 4.1. The app has 150,000+ installs. **What I did:**

- Updated the design of the majority of the app screens (over 10 screens), set new app icons, custom widgets (banners, carousels, etc.)
- Implemented logic like string extensions, toggles, search bar, adjusting content based on device screen size, managing on-device push-notifications
- Created presentation images with screenshots for the stores

Flutter Intern | Startup Dev Team | Jan 2022 - Feb 2022

Built custom-shaped interface elements (such as sliders, buttons using CustomPainter etc.), worked with Git, transferred screen designs from Figma into Dart code. Unfortunately, the startup hasn't launched in the end

Digital Marketing Intern | Saba Group, Barcelona | Nov 2019 - Apr 2020

I was a member of marketing department w/ agile principles & scrum methodology, responsible for website info updates, email campaigns, translations for the app, managing Google My Business account

Based in
BCN

C : CS50's Introduction to Computer Science | **Harvard University**
O : Flutter Apprentice & Flutter Fundamentals | **Kodeco (raywenderlich)**
